«HEREFORD BULLS»

..... *DeBerard Cattle Co - Laramie, WY*

DeBerard Cattle Company is owned and operated by Jason and Kimberly DeBerard. The DeBerard family has been showing and selling Hereford cattle for five generations going back to the early 1900s. Our program is based on the premise that to build a quality cattle herd you must have genetics that work. We believe that raising quality females and focusing on maternal traits are important in developing your herd and increasing the quality of your cattle. We continually build on those traits using quality genetics in our program. Birth weight, calving ease, and udder quality are all traits we pay close attention to. In addition, pigmentation is important at our high elevation of 7,235 feet above sea level. Muscling, fleshing ability and disposition are also important traits in our program. As a breed, Hereford cattle are considered to be appealing due to their fertility and adaptability (Agricultural Research/March 2010 Issue). It is our opinion that Herefords can greatly increase the quality of many commercial herds due to their traits. "Today, the Hereford-Angus cross female is widely viewed as one of the best females available for commercial beef production...these crossbred cattle have high fertility, are long-lived and thrive in temperate regions." (Agricultural Research/March 2010 Issue). The DeBerard Cattle Company program started with a quality base and we are reintroducing more of our family's line one genetics, as well as other top genetics in the Hereford breed to provide top quality bulls and females that will benefit both the purebred and commercial sides of the industry.
